

An alliance for boosting the European Innovation in Predictive Maintenance through entrepreneurial cooperation, education, and training

About Predictive Maintenance (PM)

Predictive Maintenance (PM) is a critical element for the optimization of sources used in the economy and fundamental infrastructure systems. PM's function is to anticipate and prevent the breakdown or catastrophic failure of critical infrastructure (via digital approaches) and generate a multitude of positive economic and social benefits in terms of human safety, resilience of infrastructure, and energy and resource savings. The need for comprehensive Predictive Maintenance Systems (PMS) and digital infrastructure is critical, particularly regarding transportation infrastructure and equipment where issues of human safety and preservation of resources is of the highest importance.

The critical role of PM (as an emerging work field) and the blooming prospects of its market, deems crucial the need to develop comprehensive training systems specialised on Predictive Maintenance to properly prepare the next generation of human capital that can effectively apply PMS across a wide variety of industrial/manufacturing infrastructure and equipment. The need for effective and widely used, education, training, testing, and certifying methodologies, is a key component in assuring the societal, environmental, and economic benefits that Predictive Maintenance can offer to the industrial sectors in Europe.

Partners

PreMETS objectives

PreMETS aims to introduce an alliance for boosting the European Innovation in Predictive Maintenance through entrepreneurial cooperation, education, and training for the development of a coherent digital platform that covers all aspects of the PM training process. The **general objectives of the PreMETS** project are:

- Fostering new, innovative and multidisciplinary approaches to teaching and learning in the field of PM by introducing an innovatively co-created PM curriculum with micro-credential certification and introducing a bespoke digital learning & co-creation platform for upskilling the current and future PM workforce.
- Helping PM companies and related service provider SMEs achieve corporate social responsibility by directly impacting on reducing environmental damage, diminishing social and societal risks and boosting their revenues.
- Promote initiative and entrepreneurial attitudes, mindsets and skills to adults, vocational and higher education learners with regards to achieving resilient PM solutions.
- Facilitating the flow and co-creation of knowledge between higher education, VET actors, research, the public sector and the business sector in the field of PM in order to jointly contribute to upskilling and regional economic growth by developing capacities and clusters in the field of PM.
- Building and supporting effective and efficient PM higher education, vocational education and training systems by delivering via a joint digital platform, which enables connectivity, accessibility and inclusivity to high quality education for all.

PreMETS partners

ACCELIGENCE Ltd

ACCELIGENCE Ltd has been established in 2019 in Nicosia, Cyprus. ACCELIGENCE focuses on the design, development and system integration - verification of custom-made robotic solutions, with a particular focus on Unmanned Aerial Vehicles (UAVs). ACCELIGENCE is building from scratch its own UAV prototypes, of varying technical requirements tailored to different applications and sectors' needs.

Centre for Research and Technology Hellas (CERTH) /Hellenic Institute of Transport (HIT)

The Hellenic Institute of Transport (HIT) is part of the Centre for Research and Technology Hellas (CERTH). CERTH/HIT is a pioneering, internationally recognized and renowned research institution in Greece and Europe. Since its establishment (in 2000) until today it offers basic and applied research, as well as high quality technical services in the field of transport. The activities of HIT focus in particular on issues relating to the organization, operation, planning and development of infrastructure, the standardization, economic analysis, management, vehicle technology and the impact assessment of land, maritime, air, and multimodal transport services.

University of Pireaus Research Center (UPRC)

The University of Piraeus Research Center (UPRC) was established in 1983 and it is a research, non-profit organization. University of Piraeus' and its Research Center's research output is characterized by scientific excellence and wide range of application. It aims to support the local economic and business structure of the greater Piraeus area (blue growth, traditional occupations, innovation etc.) as well as the society in general by supporting joint actions and projects. The Quantitative Analysis in Shipping Laboratory (QuALS), established in 2015, serves educational and research needs in shipping and maritime transport with emphasis on modelling, forecasting, data and market analyses.

NEWS - PreMETS Achievements & Ongoing work

PreMETS Kick-Off Meeting highlights

The first spark of the PreMETS project light up on the first physical (kick-off) meeting on CERTH HQ in Thessaloniki during the end of August (28-29 August 2023) in a fruitful 2-day event. During these days, project partners presented their organizational profile, planned the work for the upcoming 6 months and set up important key strategic goals, operational approaches and common working methods. **Next project meeting will take place virtually during December 2023** before Christmas holiday period.

Project key planning documents have been submitted!

During the first 6-month period of the PreMETS project (July-December 2023), seven (7) deliverable reports have been finalized and published that contain key information about the proper implementation of the project activities. Each deliverable report describes different key implementation, impact and strategic plan. The list of published deliverables during the first semester of the project are:

- Project management plan
- · Data management plan
- Future Predictive Maintenance (PM) employee profile
- · Macro quality assurance plan
- · Communication and dissemination plan
- Project visual identity pack
- · Preliminary Impact measurement plan

You may find the deliverable reports in **PreMETS Zenodo community** (which you can als bookmark it!) by **clicking on the SUBMIT button** above.

Work in progress....

Currently, PreMETS project partners prepare three (3) deliverables over the upcoming 6 months. More specifically, these efforts focus on:

- · External evaluation strategy
- · Predictive Maintenance (PM) toolkit
- · Train-the-trainers toolkit

Follow us!

This project has received funding from the European Union's Erasmus+ Programme.
